

Final Closure Report

- **Project Name:** ParaBank Website

- **Introduction:**

This Final Test Report summarizes all testing activities performed on the ParaBank Online Banking website.

The objective of the testing effort was to ensure that the application meets its functional, usability, integration, and reliability requirements before delivery. Testing included both manual and automated approaches, covering UI flows, backend APIs, and core banking features.

- **Project Overview:**

The ParaBank application provides online banking services such as registration, login, account management, fund transfers, bill payments, ATM functionalities, and loan requests.

Testing focused on validating that these features function correctly and deliver a stable and user-friendly experience.

- **Scope of Testing:**

- **In Scope:**

- Authentication (Registration, Login, Logout, Forgot Login info)
 - Account Management (Account Overview, Account Details, Transaction History)
 - Transfer Funds
 - Bill Pay
 - ATM Services (Withdraw, Deposit, Check Balance)
 - Loan Request
 - Outer pages (Home, About, News, Contact us, about us)
 - Static Testing
 - API Testing
 - Automation Testing for high-priority scenarios

- **Out of Scope:**

- Performance, Load, and Stress Testing
 - Security Penetration Testing
 - Backup & Recovery Testing
 - Backend encryption mechanism

- **Test Approach & Methodology:**
 - **Manual Testing Techniques:**
 - Functional Testing
 - UI/UX Testing
 - Validation & Error Handling
 - Integration Testing
 - Static Testing
 - **API Testing:**
 - Performed using Postman
 - **Automation Testing:**
 - Automated high-priority scenarios using Selenium.
 - Executed on Chrome browser
 - Scripts implemented using Page Object Model (POM)
- **Test Environment**
 - OS: Windows 11
 - Browser: Google Chrome – Mozilla Firefox
 - Tools: Postman, IntelliJ, Sheets for Test Cases, Bug Tracker
- **Test Execution Summary:**

Test Type	Total Test Cases	Passed	Failed
Functional Testing	172	146	26
UI/UX Testing	17	6	11

- **API Testing Results:**

APIs Tested	Total Test Cases	Passed	Blocked	Failed
18	63	51	1	11

- **Automation Testing Results:**

Automated Test Cases	Passed	Failed
38	37	1

- **Exit Criteria Status:**

Exit Criteria	Status
All critical modules tested	Completed
All high-priority API test cases executed	Completed
All automated scripts executed successfully	Completed
Test summary documentation	Completed

- **Conclusion:**

- Testing for the ParaBank web application is successfully completed.
- All exit criteria have been met.
- API Testing and Automation Testing for the ParaBank application were completed successfully.
